

## **Proposal for reducing your EB Bill by up to 90%**

Dear Sir / Madam,

**Sub: Proposal for reducing your EB Bill by up to 90% for your Showroom**

You can reduce your monthly electricity costs by up to 90% with a 10KW / 20KW / 30KW solar power system depending on your consumption. **You can use solar power day and night and no batteries needed.**

A 10 KW solar power system saves you Rs.30,000+ per bill (for 2 months Billing cycle).

***RETURN ON INVESTMENT is within 4 to 5 years.***

***Income tax benefit : Accelerated Depreciation (80%) on solar power plants in the first year of installation.***

After the payback period of 4 to 5 years, you get FREE Power for more than 20+ Years. Savings GUARANTEED.

Very Low maintenance. Only cleaning the Solar Panels' surface periodically, whenever dust covered.

Solar Power will be generated on all days as long as sun shines.

The Generated and Unused Solar Power will be stored in the Power Grid and you can reuse the power during working days. For example, the month June has 30 days, but your showroom works for 26 days (excluding 4 Sundays). However, the solar panels will generate power on all 30 days including 4 Sundays. So your unused power is automatically stored in power-grid for reuse during your working days.

**To know more and save lots of money please call 98408 67653 or 94449 72600 and start saving as soon as possible.**

Our meeting will be useful for you to make an informed decision

We Design, Supply and Install 10 KW to 100 KW SPV Systems.

Thanking you,

Regards,  
U.Naganathan
